Satellite Data Visualization

Share

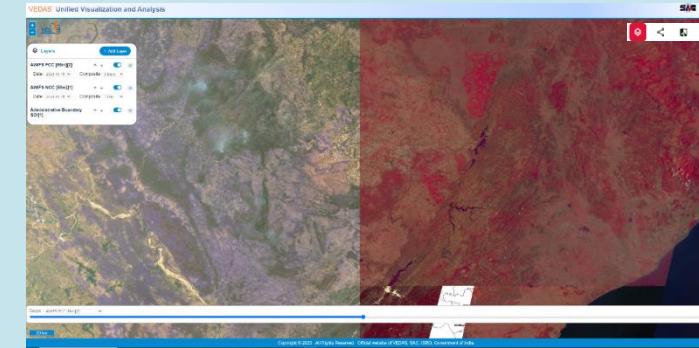

If a user wants to share his analysis to another user, which can consists of number of layers, its duration, visibility, swipe panel enabled/disabled, this can be done using this share button. On clicking this button, a pop up shows up which will have a link to share. This link can be copied and shared via any sharable platform1.

Layers

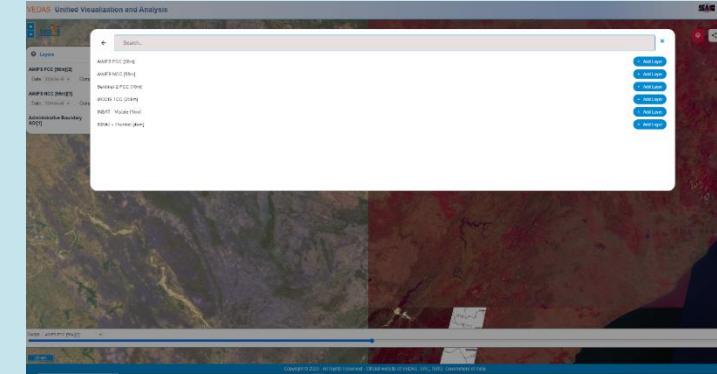

Layers are categorised in different themes like reference, visualization etc. Which again categorised in subtheme. User can select a layer by selecting theme and subtheme.

Swipe

Clicking the swipe button will display a swipe panel at the bottom of the website. This panel includes a dropdown menu listing all the selected layers from the layer panel. Users can then select a layer from the dropdown based on their needs. Additionally, a slider allows users to drag from right to left or left to right to visualize the layers.

All Layers

All layers displayed here irrespective of the category.
User can search for a layer by typing in search bar.
